

H2M is able to manufacture, rent and/or sale all kinds of auxiliary facilities as stand-alone or with an accommodation project. These 'specials' are based on modified standard DNV 2.7-1 offshore containers in 10ft or 20ft, standard or high-cube. Typical modifications are penetrations, interface recesses, extra doors, etc.

Some examples of the various possibilities are:

Workshop Container: 10ft or 20ft container, incl. workbench, drawers, power sockets, lightning, HVAC and workshop specific equipment (electrical, rigging, mechanical etc.).

Storage Container: 10ft or 20ft container, incl. power sockets, lightning, and optional HVAC.

Equipment Container: 10ft or 20ft container, incl. power sockets, lightning, HVAC and with or without specific equipment (generators, hydraulic power etc.).

Satellite TV/Internet Container: 10ft or 20ft container, incl. power sockets, lightning, equipment racks and satellite dishes on top (on removable bracket).

Fresh Watermaker Container: 10ft or 20ft container, incl. power sockets, lightning, 2 or 3 RO-units (up to 72m³/day potable water from seawater) for full redundancy and 3m³ buffer tank.

Sewage Treatment Container: 10ft or 20ft container, incl. power sockets, lightning, Biological Sewage Plant to treat up to 11,1m³ to dispose or use as clean water.

Service Container: 10ft or 20ft container, incl. power sockets, lightning, HVAC and furniture and equipment for use as laboratory, office, mud logging etc.

Custom Build: If there is a need for a custom build container, please feel free to contact us to discuss your requirements and our possibilities.
